

Make NASA Climate Kids Pumpkins!

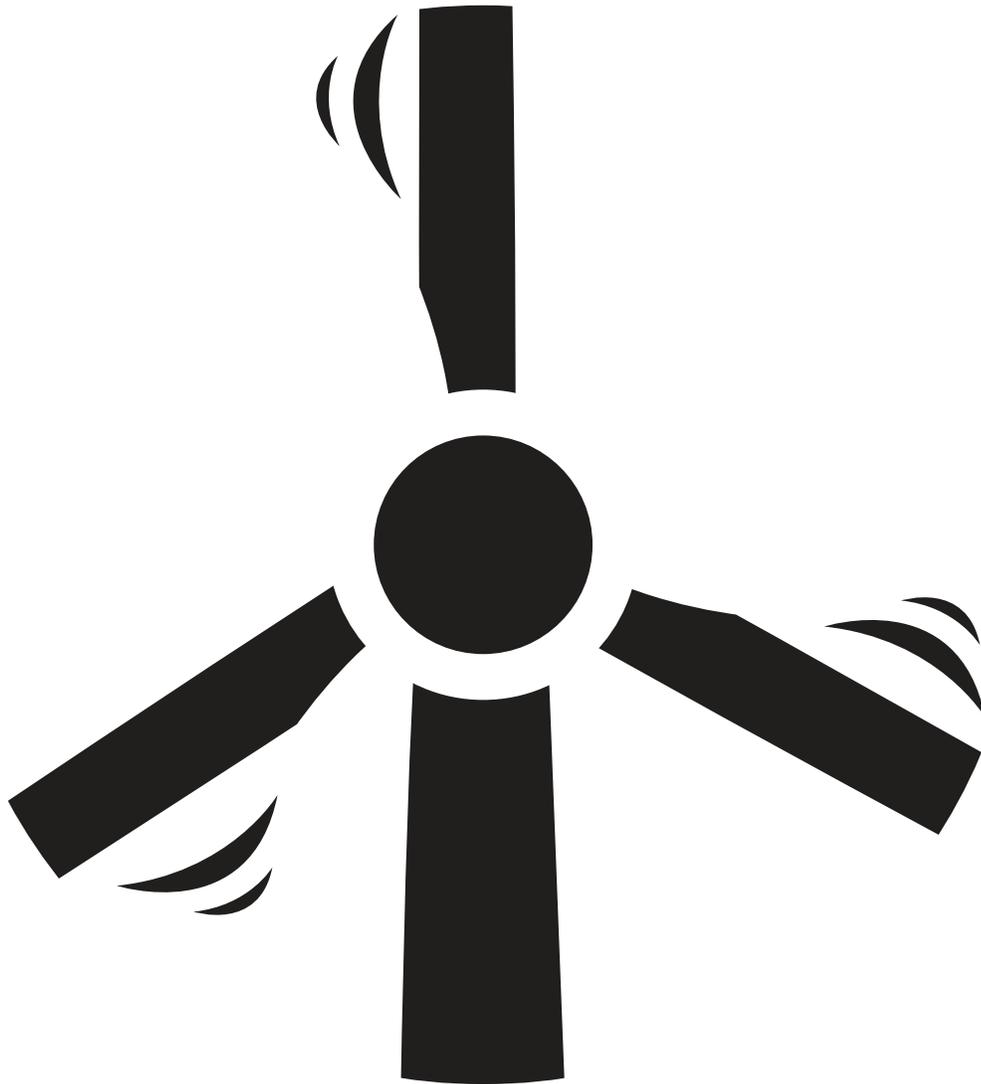

Wind Turbine Stencil

Full directions: <http://climatekids.nasa.gov/pumpkins>

Directions:

1. Print this template.
2. Place the paper on the pumpkin and secure it with tape.
3. With a black permanent marker, slowly trace the outline of the shape. The marker will bleed through the paper and leave marks on the pumpkin for you to use as a guide.
4. Remove the paper.
5. Use your black marker to trace the outline of the shape.
6. Fill in the design with the black marker or black paint.

Wind has been a source of renewable energy since the invention of the windmill thousands of years ago. Today's wind power is made from big **wind turbines**. They're over 300 feet tall, and some are made of 8,000 parts! Along with China, Germany, Spain, and others, the United States is using wind to make lots of electricity.
